Landing Boulevard lift station

League City | Landing Boulevard Lift Station Rehabilitation | WW1901F / Bid 26-051

Prepared for Jim Saunders | MurCal Inc. / Checked 12 November 2026

Owner: City of League City / Galveston County, Texas

A controls package built around your strengths

League City has specified a new SCADA panel, pump-control panel, level controls, floats and terminal boxes for its Landing Boulevard lift station. That is a defined equipment-and-integration package aligned with MurCal's municipal controls business. Start with purchasing manager Neal Cooper to identify the contractor and establish which panel supply, programming or commissioning work remains to be placed. [1, 2, 3]

YOUR SALES SCOPE

SCADA/pump-control panels, level interfaces and integration. [1, 2]

PROJECT POSITION

Prime bids closed November 3. Award and supplier scope to confirm. [1]

YOUR NEXT MOVE

Ask Neal for the award record and controls-package contact. [3]

Why it fits

01 The notice expressly includes SCADA and pump-control panels. MurCal builds custom, SCADA-compatible municipal panels. [1, 2]

02 Floats, terminal boxes and sensory controls make the interface package relevant to MurCal's integrated station controls. [1, 2]

03 MurCal lists sewage-lift applications and Texas municipal work. Present a project-specific controls proposal through the permitted contractor route. [2]

Your first move

Neal Cooper | Purchasing Manager

Direct procurement-status contact. Formal inquiries: Purchasing (see page 2). [1, 3, 4]

neal.cooper@leaguecitytx.gov | 281-554-1345

Ask: Neal, who is handling the controls package for WW1901F / 26-051? Please share the bid tabulation or award status and the permitted contact for panel supply, programming and commissioning.

From insight to action

Where your offer fits

PROJECT NEED	YOUR CONTRIBUTION	NEXT STEP
SCADA + pump panels [1]	Custom municipal panel package. [2]	Obtain the specifications and identify the package buyer.
Level-control interfaces [1]	Integrate floats and station controls. [2]	Check approved components, I/O and existing SCADA interface.
Station integration [1, 2]	Offer programming and setup support.	Ask the contractor which integration scope remains available.

No controls-package value is published in the notice. Build a quote from the specifications and the contractor's confirmed purchasing scope. [1]

People to know

FORMAL INQUIRY ROUTE

Purchasing@leaguecitytx.gov | 281-554-1400. Submit written project inquiries here. [1, 4]

CONTRACTOR / PANEL BUYER

Ask Neal for the awarded contractor and controls buyer; neither was verified in the records reviewed.

What happens next

- **NOVEMBER 3 -- PRIME BIDS CLOSED**

  The notice's explicit deadline has passed, despite its Open status label. [1]

- **NEXT -- AWARD / SUPPLIER ROUTE**

  Get the bid tabulation, award decision and controls purchasing contact. No supplier deadline verified.
