Shinnecock composting

Supporting research | CAL-SERCI-O2-001 | v2.0 | 4 November 2026

Decision and scope

Qualify first is Caltrio’s judgment. Equipment and training are documented program activities; ASP, a specific equipment budget, supplier interest, grant execution and an accessible purchase are not confirmed. This revision reorganizes the uploaded brief; it is not stakeholder verification.

Funding labels

EPA’s fact sheet lists $765,299; July announcements use $750,000. Both concern the whole program, including other infrastructure. O2Compost’s equipment allowance and contract value are not established. [1, 2, 6, 7]

Current public research boundary

The Nation’s visible bids listing and accessible owner/funder pages were checked. No named SERCI tender or supplier award was established in those retrieved records. That is a bounded result. Current equipment commitments, consultant/vendor involvement and the actual buying route require further verification. Do not treat July selection as a newly opened bid.

Practical qualification

If a useful opening is confirmed, offer a scoped assessment and, where warranted, a pilot with training. Separate design, equipment, freight, site work and support when preparing budget pricing. Confirm feedstocks, operating volumes, bulking, footprint, power, operator availability, curing and outlets. If no design, equipment, training or advisory role remains, monitor instead of preparing a speculative quotation.

Original preserved

Source: https://drive.google.com/file/d/1pFbFnDXFoP2ukX_2b3rAdgZtuSJJhMmX/view. The original downloaded file is preserved locally; its 3 November 2026 content was compared with the uploaded copy. No customer-facing original has been replaced.

Source ledger

[1] EPA | SERCI fact sheet | Jul 2026

Selected recipient; $765,299 whole-program funding. Names collection truck, sorting/storage shed, compost equipment and staff safety/operations training. Does not select ASP or a supplier.

Open primary source

[2] Nation | Funding update | 31 Jul 2026

Nation announcement uses $750,000. This differs from the fact-sheet amount; no reconciliation or equipment allowance is inferred.

Open primary source

[3] Nation | Environmental Department

Undated current owner page names Shavonne Smith as Director, with shinnecockenvironmental@gmail.com and 631-458-1231. Routing contact, not established as procurement authority.

Open primary source

[4] O2Compost | Operator training

Undated official supplier page describes training, remote technical support, equipment and design drawings. Capability evidence, not proof of project selection.

Open primary source

[5] O2Compost | Pilot projects

Official supplier page describes ASP feasibility, operating-procedure and finished-product evaluation. Pilot proposed only if useful and accepted.

Open primary source

[6] EPA | Selection and conditions

Distinguishes selectees and recipients; grant selection is not proof of an executed supplier contract or an open purchasing window.

Open primary source

[7] EPA | Project announcement | Jul 2026

Original brief dates this release 29 July 2026; the accessible page text omits a publication date. It establishes household/office organics and food-waste collection and uses $750,000.

Open primary source

[8] Nation | Published bid notices

Public notice listing reopened 4 November 2026. No named SERCI equipment solicitation established in that visible listing. Bounded search, not proof of universal absence.
